

KEEPING YOUR DRAINS CLEAR

NO Fats, Oils & Grease DOWN THE DRAINS!

Fats, Oils and Grease, known collectively as FOG, represent the most serious enemy of our sewer lines. No FOG down the drains! This includes: *Butter, Cooking oil, Grease, Food scraps, Lard, Margarine, Meat scraps or Shortening*

When FOG is dumped down the drain, it forms large, thick grease balls that clog pipes. Clogged pipes can result in sewer backups. Preventing sewer backups from FOG blockages also saves you money because if we need to clear your drains due to FOG blockages, the tenant is responsible.

Do's

- Can the grease! Allow grease to cool in a container before throwing it in the trash.
- Wipe before washing. Use a paper towel to wipe out the remaining grease in the pan.
- Keep drains clean by pouring 1/2 cup of baking soda down the drain followed by 1/2 cup of white vinegar. Wait 10-15 minutes and then rinse with hot water.

Don'ts

- Don't pour fat, oil or grease down drains or garbage disposals.
- Don't use hot water to rinse grease off cookware, utensils, dishes or surfaces.
- Never use Drano or Liquid Plumber products as they will damage the pipes.

NO Hair DOWN THE DRAINS!

Hair is a major cause of clogged drains, especially in the shower, tub and bathroom sink. Don't let hair go down the drain. To prevent hair from going down the drain we recommend a drain strainer.

ONLY Toilet Paper!

Besides human waste ONLY toilet paper goes in the toilet. Nothing else! No Baby Wipes, Feminine Products, or Paper Towels – they will clog the toilet drain and you will be responsible to clear the drain.

Thank You For Keeping The Drains Clear!
